NVOCC | Freight Management Software

Freight Management/ NVOCC

Freight Forwarding Software will help your company grow every part of the business with its complete suite of applications for each activity within the Logistics industry. Similarly, consolidators, freight Forwarders, Forwarding Agents, NVOCC, Third Party Logistics Providers, Airlines, Ocean Carriers can take advantage of our Freight Forwarding Software to optimize their business flow in order to increase productivity and generate bigger profits. Companies of any size can benefit from Freight Forwarding Software. A set of on-demand features and components can be added to the application as the business requirements grow.

Import Module

This module takes care of complete Import procedure and documentation required for Customs and Ports. IGM (Import General Manifest) is generated as per ICEGATE requirements. Rest all formats and documents viz. Advance lists, Arrival notices, Delivery orders(D/O), Invoices and different forms and letters required by Shipping lines/liners, NVOCC, Slot agents are generated based on IGM.

Export Module

This module contains complete Procedure, Documents, Hard/Soft copy formats required for Liners, Shipping Agents, and Freight forwarders. Complete Customs and Port requirements are taken care, start from Booking, D/O, Advance list, B/L (Bills of Lading), Invoicing, Etc.

Yard Management

Yard Management maximizes yard and warehouse efficiency by managing the flow of all Inward and outward containers. Our yard management module enables you to plan, execute, track, and audit loads based on critical characteristics like shipment type, load configuration, labor requirements, Repair estimate.

Tally integration

In Freight forwarding tally integration user don't need to make the entry in both software, Accounts module can easily map with the tally in the single click. Tally is a complete system with an excellent grip in accounting features, with our Freight forwarding Tally integration easily transfer your transactions from Freight forwarding software to Tally.
